

JONDU JESSE

IT & Biometric Systems Specialist | Customer Service Professional

Phone: +256 754 490 237 | Email: jondujesse@gmail.com

Portfolio: <https://portfolio-5b977.web.app/> | GitHub: github.com/jesethegreat6190

Professional Summary

Detail-oriented IT professional with hands-on experience in **biometric data collection** systems, customer-facing technical support, and equipment management. Developed and tested biometric enrollment features including **fingerprint capture**, **webcam-based photo acquisition**, and **OCR ID document scanning**. Fluent in **English** and **Luganda** with a strong commitment to **accuracy**, **data security**, and delivering quality service in fast-paced environments.

Core Skills

- **Biometric data collection** (fingerprint, photo, ID scanning)
- **Customer service** & applicant assistance
- IT equipment operation & maintenance
- **Data security** & confidentiality protocols
- **Accuracy**-focused quality assurance
- Fast-paced workflow & multitasking
- **English & Luganda** fluency

Education

Bachelor of Science in Applied Information Technology (B.Sc. AIT)

ISBAT University, Kampala | 2026 — Present (pursuing)

Diploma in Information Technology

ISBAT University, Kampala | 2024 — 2025 (Completed)

Experience

IT Support & Biometric Systems Developer

Freelance / Project-Based | 2024 – Present

- Developed and tested **biometric enrollment systems** including **fingerprint capture**, webcam-based photo acquisition, and **OCR ID document scanning** for identity verification
- Operated and maintained **IT equipment** ensuring reliable performance during all operations
- Assisted users through technical processes with patience and clear communication
- Maintained strict **data security** protocols when handling sensitive personal information
- Managed multiple tasks simultaneously in **deadline-driven** environments

Digital Content & Media Support

Encounter Church Media Team | 2022 – Present

- Provided **customer-facing technical support** during live events and broadcasts
- Managed multimedia equipment and maintained production quality standards
- Collaborated with diverse teams to deliver consistent service to audiences of 200+

Biometric Systems Project

UPDMS — Biometric Enrollment & Identity Verification System

- Built **fingerprint capture** module using browser-based fingerprint API for applicant enrollment
- Implemented **webcam-based photo capture** for identity documentation and record-keeping
- Integrated **Tesseract.js OCR** engine for automated extraction of NIN, name, DOB, and nationality from ID cards
- Designed end-to-end workflow ensuring **100% accuracy** in biometric data collection and verification
- Applied **data protection** measures to safeguard personally identifiable information

SYSTEM DEVELOPMENT & RECORDS

Church Registration System Developer

Grace of Jesus Christ Ministries | 2024 - Present

- Designed and deployed a registration platform capturing and maintaining member records with strict data accuracy and confidentiality protocols

- Implemented role-based access controls and audit trails to ensure data integrity
- Managed sensitive personal information in compliance with data protection principles
- Developed reporting dashboards for membership statistics and attendance tracking

Dairy Management System Developer

[Farm/Organization Name] | 2024 - Present

- Built a full-stack PHP/MySQL system managing operational records: animal inventory, milk production logs, health checks, feeding, and financial transactions
- Designed data capture interfaces with validation checks to ensure accurate daily data entry
- Created reporting features for production tracking and performance analysis

Languages

- **English** — Fluent (written and spoken)
- **Luganda** — Fluent (written and spoken)
